

## **Job Description**

### **Introduction/ About Us**

Launched in May 2018, Bounce is the brainchild of Vivekananda Hallekere, Anil G and Varun Agni. Bounce was launched as India's first smart mobility solution, with a mission to make daily commute quick, stress-free, reliable and convenient. With our ride-sharing avatar, we tap into the need for affordable and safe travel options for various daily commuters. Right from covering long distances to providing last-mile support, we aim at addressing diverse mobility needs.

Indigenously built with in-house R&D, Bounce dockless scooters were first launched in Bengaluru and quickly became the desired mode of transport in the city, as well as in parts of Karnataka, Telangana and Andhra Pradesh. In its first year, Bounce facilitated 1,00,000 rides a day with a 30,000-strong scooter fleet on road. Bounce remains one of India's fastest-growing start-ups that has scaled to 100K transactions in a day. Bounce's valuation stood at a staggering 500 million USD in just 11 months from its conception. Expanding from the shared mobility business, Bounce has also ventured into Zuink, which retrofits ICE engines with electric ones. And has also built Bounce Infinity, India's first electric scooter with swappable batteries.
